

E911 Address

Although the City of Fifty Lakes processes E911 address applications and maintenance requests, Crow Wing County assigns, installs, and provides maintenance and replacement for the county-wide E911 addressing system.

The role of the Enhanced 911 Addressing system is to provide the public with competent, timely and effective emergency and non-emergency public safety service. 911 is the telephone number that provides direct access to police, fire and medical assistance and initiates a coordinated response using this system. The primary purpose for utilizing the E911 addressing system is for public safety services to locate your property; the use of your address for mail delivery service is a by-product of the E911 system. The proper display of your address number and sign assists emergency responders in quickly locating you when an incident is reported and may reduce response time, save lives and property.

What to know:

- You can apply for an E911 address with the City of Fifty Lakes. Please call 218-763-3113 for more information. You will need to provide parcel and contact information, payment of fees, and a site plan showing the location of your proposed or existing driveway. City staff will apply to Crow Wing County on your behalf.
 - Once Crow Wing County receives the application, it will be reviewed by a county staff member within two business days. Once reviewed, your new address number will be assigned and sent to you via your provided contact information.
 - County staff will visit your property to determine a good location for your sign and submit a request to Gopher One Locate. Once the local underground utilities have been flagged, county staff will return to your property and install your new blue E911 sign. Please note that signs are typically not installed during the winter season.
 - Two homes or structures can have addresses on one shared driveway. When a third address is requested at a driveway or entrance, it is required that a new road be created to accommodate the increased number of addresses using that entrance. The shared driveway will be named as a new road and the applicant may be charged an additional fee for the installation of new street signs at that intersection, and all of the addresses at that entrance will be re-assigned to the new road.
 - If your sign is damaged or removed, please contact the City of Fifty Lakes for assistance requesting a new sign. There is no charge for maintenance or replacement.
 - To set up mail delivery, first apply for an E911 address with the City of Fifty Lakes. After your address is assigned, contact your local mail delivery service provider to set up mailing services.
 - Moving your driveway or changing the entrance point to your property will likely require a new address assignment which would require a new fee and sign to be installed.
 - An address does not imply legal access.
